

Protective Sheeting 41-10091 & 41-10092

Issue: Protecting countertops during castable mounting or platen and specimen holder changeover.

Applications: Use in the lab when working with epoxies and diamond suspensions. The protective sheet wipes off easily to allow less time for clean-up and keeps workstations clean.

Recommendation: Buehler offers two sizes of protective sheeting from which to choose. There is a small 12"x12" (305x305mm) sheet 41-10091 and a larger 16"x16" (375x375mm) sheet 41-10092.
